PROBLEM

Malaysia is using AI faster than it is training for it.

56%

of professionals already use AI at work

26%

have had formal AI training

600,000+

workers needing reskilling within 3–5 years

That is a 30-point training gap.

ROAST MY CV — VERDICT

Job-ready: NOT YET

and here's why, in plain words:

- Says “Python” — no project anywhere proves it.
- Two past roles with zero measurable outcomes.
- Target role is AI-heavy — no AI tools shown.

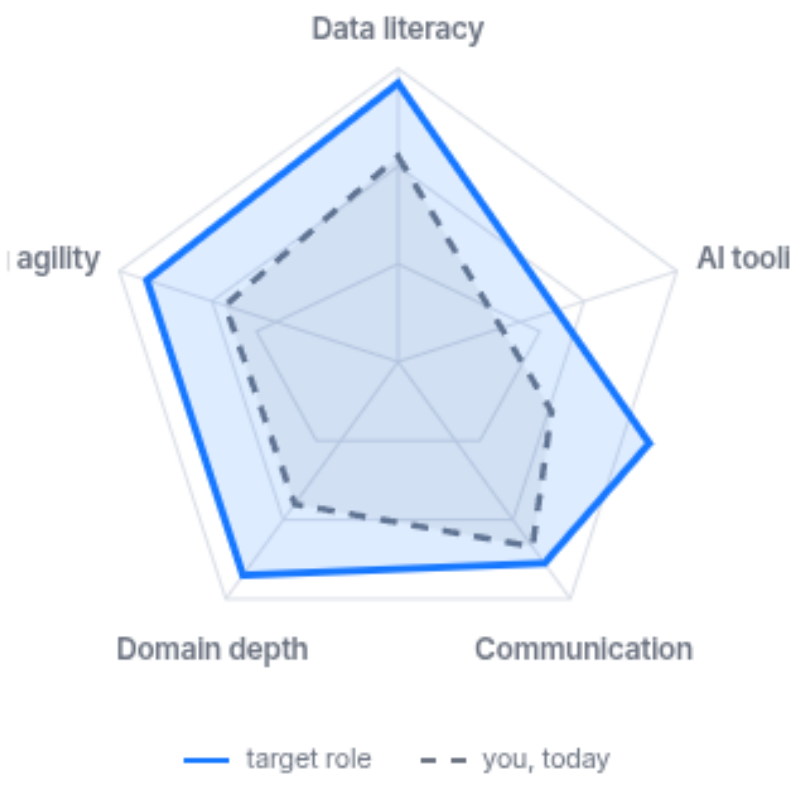

LIVE DEMO

The Future Skills Radar.

Built from dated public job-posting data — every role scored.
